- ✓ **COOL DESIGN**
- ✓ **SIMPLE TO OPERATE**
- ✓ **2 OR 3 SPEEDS**
- ✓ **PULSE FUNCTION**
- ✓ **2 LITER CONTAINER**

ROTOR BAR BLENDER – FOR EVERY BAR

- Robust construction with highest quality materials for longest durability**
 High temperature resistant and quiet special motors with overload protection switch. Case made out of dull **stainless steel** for very easy cleaning. Connecting piece to the bowl made out of tough, durable synthetic material for optimal vibration damping and easy cleaning. High quality rubber feet for safe standing and quiet operation. Fast operation with 2 solid lever switches made out of metal. Accessories and spare parts are available even after many years, as usual for all Rotor products.
- 2 models are available:**
 - Rotor Bar Blender 2**
 The inexpensive, simpler model “Rotor Bar Blender 2” has 2 speeds. The maximum continuous power consumption is 400 Watt, the peak power is about 700 Watt.
 - Rotor Bar Blender 3**
 For bigger quantities we recommend the “Rotor Bar Blender 3”, with 3 optimized speeds, and continuous power consumption of 550 Watt. Peak power of this model is about 1000 Watt. A robust electronic speed control supplies the motor with the necessary power only. This makes the blender very quiet and economy. In addition, the electronics guarantees a gentle, smooth start almost without splashing up or jolting.
- Pulse function (both models)**
 For short remixing, briefly tip on the switch with one finger.
- Special cutter head «RBB» for drinks**
 The 4 high quality blades are specially shaped for optimal blending. For example the **Piña Colada** gets the right consistency and as well **“Frozen Drinks” made with crushed ice** succeed perfectly. Not suitable for crushing of whole ice cubes. The cutter unit is made out of stainless steel, easy to dismantle from the container for cleaning. The 2 stainless steel bearings are sealed up 4 times! Quiet, very robust coupling with shock absorbers. Blades, gasket and shock absorbers can get easily exchanged.
- Option: cutter head with “ice knife”**
 Special blade for **crushes ice cubes** to snow with in a few seconds. In general good for a more intense and faster process as well for especially demanding products. Ideal for finest puree too, or foamy drinks and **smoothies**.
- Transparent container with 2 liter content**
 Made out of strong and dishwasher resistant polycarbonate, with scale. The robust lid has an integrated additional opening. Containers are **stackable**.

TIPP

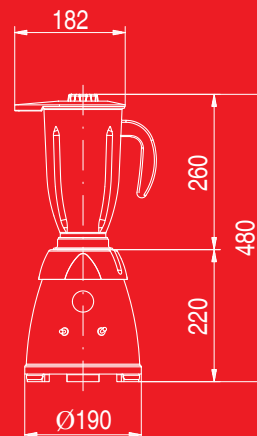

The proven models **“GT”** from Rotor are blenders with higher capacity, variable speed and precious design. Also with 4 liter container.

+ Swiss made

Option

Container made out of stainless steel (2 liter), stackable. Highest esthetics, hygiene and long durability.

Power supply	
Rotor Bar Blender 2	230 V / 50 Hz / 1,8 A
or	120 V / 60 Hz / 4,2 A
Rotor Bar Blender 3	230 V / 50 Hz / 3,2 A
or	120 V / 60 Hz / 5,8 A

Package dimensions

L 410 x W 240 x H 300 mm
(1 Motor base and 1 container)

Weight

Net weight 4 kg
Gross weight 4,6 kg
(additional weight for the stainless steel container 0,6 kg)
